

Dr Ysa has been a Vascular and Endovascular Surgery Consultant in Hospital de Cruces (Barakaldo. Spain) since 2003. His Department is considered a first-line Unit in the endovascular management of CLI (particularly in the BTK/BTA segments). He developed his Vascular Fellowship Programme in Hospital del Mar (Barcelona) and thereafter completed his training with short stages in Montefiore Hospital (F. Veith. NY. USA) and Houston Methodist Hospital (TX. USA). In 2006 he became Fellow of the European Board of Vascular Surgery and in 2011 he joined St Mary's Hospital (London. UK) as a Senior Specialist Registrar.

For the last ten years his activity has been mainly focussed in the endovascular treatment of the lower limbs, routinely performing complex CTO revascularizations, including any sort of bidirectional access, transcollateral approaches, plantar loop or venous arterializations. His Unit has presented multiple communications in well-recognized international symposiums and has published many papers in first-line journals of his specialty. He is also a reviewer in the Annals of Vascular Surgery since 2008.
